## Professional Summary

---

**Full Stack Developer** skilled in the **MERN** stack and **MySQL**, with a strong foundation in building dynamic web apps and **RESTful** APIs. Experienced in **AI** and machine learning, including model deployment and **LLM**. Passionate about combining **full-stack** development with **AI** to create smart, impactful solutions.

## Technical Skills

---

### Languages & Frameworks:

JavaScript (ES6+), TypeScript, Node.js, Express.js, React.js, HTML5, CSS3, EJS

### Databases & ORMs:

MongoDB, MySQL, Mongoose

### Tools & Platforms:

RESTful APIs, GraphQL, JWT Authentication, Docker, Git & GitHub, Postman

### AI & Machine Learning:

Python, OpenAI API, LLM integration, Flask, FastAPI, scikit-learn

## Education

---

### Bachelor of Science (B.Sc.) in Computer Science and Artificial Intelligence

Cairo University | Graduated 2024

## Projects

---

### WhatsApp Clone | MERN Stack

Created a live chat app with emoji support, message status tracking, JWT auth, and responsive UI.

### Find My Paint | React.js + Met Museum API

Developed an art search platform using The Met API with dynamic filters, modals, and client-side caching.

### Expense Tracker | Full Stack

Built a full-stack expense tracker with CRUD, visual spending insights, and role-based access control.

### Image Super-Resolution (Graduation Project) – Python, Deep Learning

Built a deep learning model for image super-resolution, outperforming existing solutions using CNN/GAN architectures.
